MyTAG[®]

PROTECTING PEOPLE, PROPERTIES AND ASSETS

MyTAG provides trusted Proof of Presence, Proof of Compliance and security safeguarding solutions.

Patented NFC technology that is simple to use, fully audited and secure.

Unlike Barcode/QR Code systems, MyTAG technology cannot be copied or cloned.

Secure cloud-based solutions replace outdated technologies and paper-based processes.

KEY AND ASSET MANAGEMENT

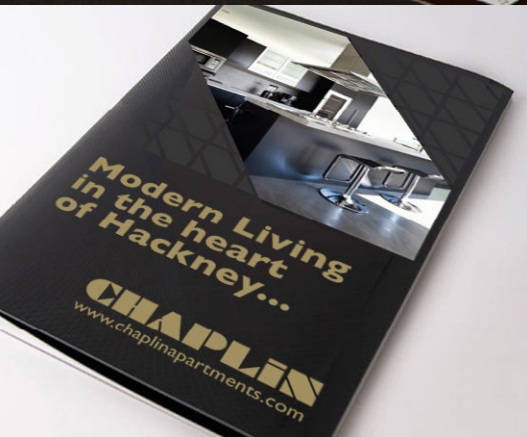

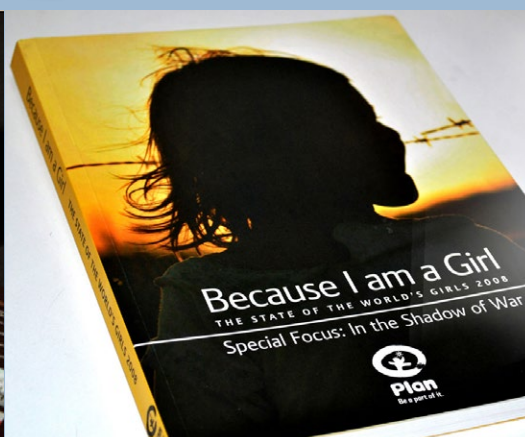

- Sign an asset out, set a time and date for return and the system will provide automatic text and email reminders to the temporary asset holders.
- Used flexibly for keys, radios, contractor passes, body cameras and even umbrellas!
- No more searching through log books, deciphering handwriting and chasing late returns – Access real-time digital logs of who is holding your assets and when they will return!
- Preloaded information on tenants, staff and contractors, limiting the amount of time spent checking out an asset.
- Save time, money and move away from paper-based processes.
- Full asset list.
- Lost and found service included.

MyTAG Asset Management can be used for any asset that is being lent to a colleague, tenant or contractor that needs returned.

To arrange for a system demonstration, please contact us on 01752 657077 or sales@mytag.io
